7.3.

Vowel Weakening

There are no full vowels in the endings; all the endings have <e> (schwa).

<finden> (< OHG <findan>)

<gebrochen> (< OHG <gibrohhan>)

<kuste> (< OHG <kusta>)

Secondary Umlaut

sælic

Final Devoicing

sanc
wart
sælic
munt

Palatalization

schône

Vowel Weakening, Secondary Umlaut, Final Devoicing, and Palatalization demonstrate that this is no longer OHG. It is not yet ENHG, because old monophthongs (<mîn>, <tûsentstunt>) show that Diphthongization has not yet happened, and old diphthongs (<bluomen>, <zuo>) show that Monophthongization has not yet happened.
